VOLUME PEDAL

SPECIAL CABLES

HIGH IMPEDANCE ACTIVE DRIVER CABLE

Use: For the connection of passive pick-up systems requiring high impedance input.

OPERA

"OPERA," a 14-channel mixer using innovative Class-A circuitry and incorporating the classic sound of analog spring reverb. OPERA is the ultimate solution for those seeking a highly portable, compact mixer with a complete menu of features.

OPERA provides six mic/line inputs with inserts and eight stereo channel inputs, plus sends for monitors, effects and recording. In addition, there are two stereo headphone jacks and both XLR and 1/4" master outputs. All faders and rotary controls are professional quality. OPERA includes the warm, natural sound of shock-mounted spring reverb, suitable for voice and instrument applications.

Perfect for any live sound reinforcement situation, OPERA comes with its own rugged road case constructed of strong and elegant brushed aircraft aluminum. Measuring only 34cm x 31cm x 17.5cm and weighing only 9kg, OPERA is extremely portable. Combined with Schertler PUB Active Speakers, OPERA controls a professional-quality sound system in a very small package.

Inputs & Outputs

TYPE	IN	OUT	CONNECTORS	
Mono channel inputs Mic/Line	6		XLR-Balanced	1/4"-Unbalanced
