

NEW UNICO

After two years spent monitoring the market, we decided to make further improvements to an already successful product like Unico to meet our users' needs even more effectively. Unico has made its success through its versatility and matchless natural sound. Now, we have further increased its flexibility, adding some important functions. By changing the size and shape of the amplifier, we have achieved softer bass. We have introduced a gain control function across the channels for improved input level control – this is vital for a clean signal. Mid control has been added to the DYN and STAT channels and a four-band equalizer is now available in the MIC channel to suit the needs of demanding musicians. More compact and lighter, now Unico is even easier to carry!

150W + 35W RMS, in combination with a biamplified system, guarantee total transparency, harmonically rich sound and full low frequency control (up to 40Hz).

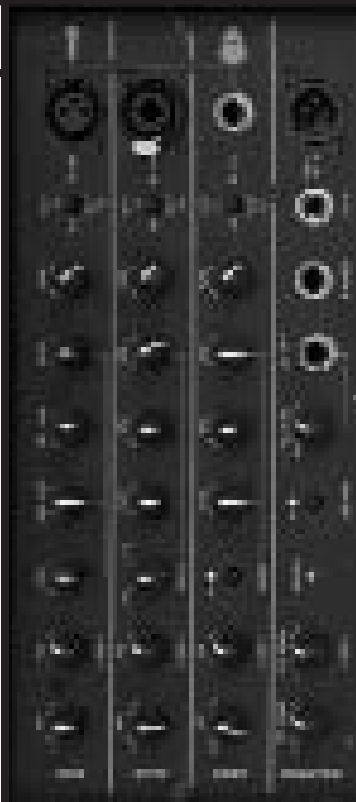

Compare Unico with any other competitor amplifier and you will appreciate the difference!

The Schertler Team.

TECHNICAL SPECIFICATIONS

FREQUENCY RESP.	40 Hz - 22 KHz
POWER	180W RMS
EFFECT	SPRING REVERB
DIMENSIONS	39X29X33 cm
WEIGHT	14.0 KG (32 lb)
WOOFER	8
TWEETER	DOME
