

ROADCASE BG-800

POWERFUL
750WATTS RMS

LIGHTWEIGHT
74 LBS

PHIL JONES BASS

ROADCASE BG-800

The ROADCASE has the convenience of a combo but with output power you get from separate component amp speakers. It has two channels: Channel one is dedicated for acoustic bass and Channel 2 for electric. Its massive 750 watts RMS power amplifier has the headroom and tone to work on just about any stage. The 12 NEOPOWER speakers have the finesse to cope with all styles of playing and yet have the weight and authority of a much larger speaker enclosure. Its tiny footprint allows you more space on cramped stages without sacrificing tone or volume. At the end of the gig you will appreciate the ease of transporting it, thanks to the power to weight ratio and ergonomically designed handling.

SPECIFICATIONS

Power Output 750 watt RMS
Speaker 12 X PJB NeoPower Speakers
Two Channel Input with Phantom Power
